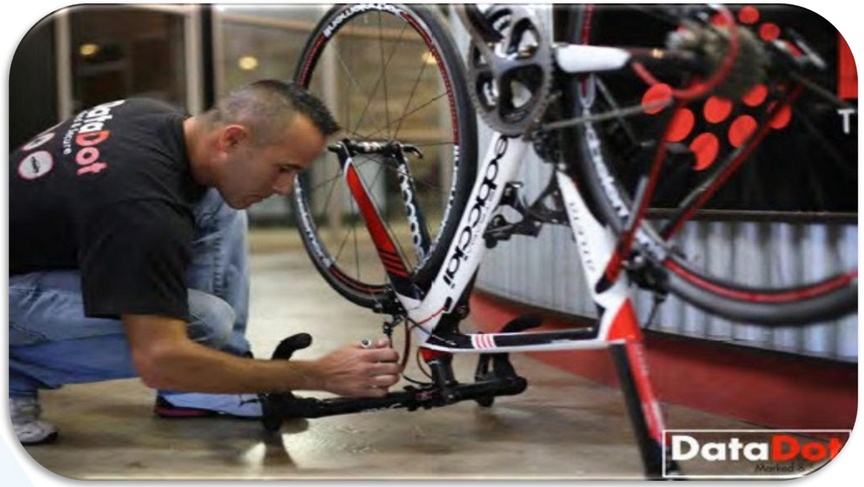
Datadot Technology SA

Microdot Technology and Authentication Solutions



DataDot Technology SA has pioneered microdot technology in South Africa since 2001. As a ISO9001 and the only ISO14001 microdot manufacturer, DataDot Technology SA has been a proved crime fighting solution.

DataDot Technology SA is the leading manufacturer and supplier to the majority of the motor manufacturers in South Africa and has microdotted in excess of 6 million vehicles.

DataDot Technology SA supplies authentication solutions to a variety of sectors:

- **Mining**
- **Household**
- **Industrial**
- **Agricultural Sectors**
- **Office Assets**
- **Electoronic Items**

Our authentication solutions provides assets with a unique identity which minimizes theft through datadotting and linking the asset to the owner via a secure database solution.

DataDot Technology SA is committed to transformation and development through its B-BBEE initiatives.

Solar Panel Solutions

Micro-dotting Solar Equipment

- Theft of solar panels is a concern in South Africa. Solar panels are valuable and easily transportable, making them a target for thieves. Combining multiple security measures and technologies can provide a layered defence against solar panel theft. DataDot Technology SA has the solution.
- The purpose of Micro-dotting all solar equipment, is to add an additional layer of security, by using DataDot Microdot Technology.
- Criminals will think twice about stealing the equipment, knowing that this equipment is identifiable.
- Equipment will be traced back to its original owner.

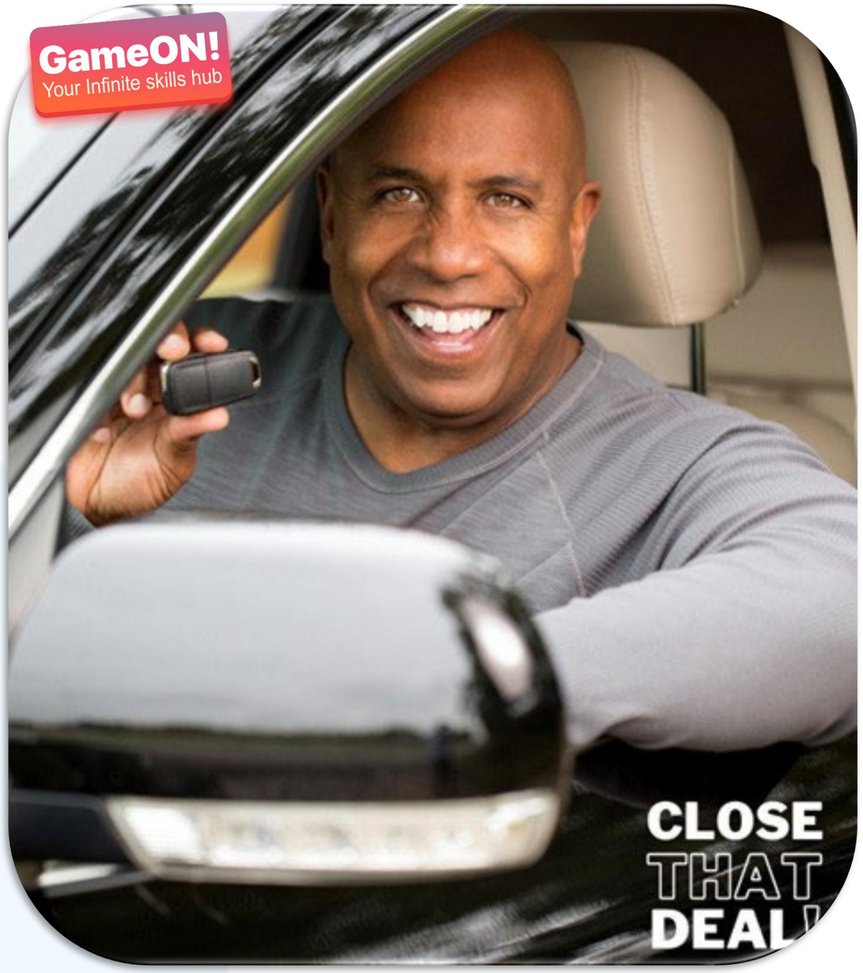
GameON Road to a Sale

Well Trained Sales Staff Sell Cars

Over 5000 active users globally



What if there was a way to teach your employees how to close a deal by following a sales process to build value in the customers mind?

Budget, time & commitment are constraints we all deal with daily, especially training our employees. *GameON* was developed to address these constraints with a technology-driven, micro-learning solution that is affordable, engaging and rewarding for companies of all sizes. Applying micro-learning allows you to train your employees better, resulting in increased knowledge and information retention, ultimately leading to better performance.

Road To A Sale! is a training solution designed to improve your employee's ability to close more deals by learning how to improve the customer experience and build value. Customers expect personalised service deserving of their spend – and as such, the sales process should meet and exceed their expectations. A high value purchase decision will only convert when the customer has a high value experience.

Road To A Sale! is developed by *GameON* that will help your employees reach the next level. Sales staff will learn how to:

- Prospect and Source Leads
- Meet and Greet
- Qualify the Customer
- Select and Present
- Platform Test Drives and Demo's
- Complete Valuations
- Initiate the Final Close and OTP Sign
- Finance Application
- Delivery and Follow up

Ishishini Lethu

Your Transformation Partner of Choice

As a **Level 2 B-BBEE** enterprise, Ishishini Lethu provides various B-BBEE solutions to their clients and is a supplier into the automotive and manufacturing sector.

What does Ishishini Lethu (My Business) offer :

As a DataDot Technology SA empowered enterprise, Ishishini Lethu initially created programmes that focused on creating entrepreneurs and a safer community through their Dot What U Got project which introduced authentication technology in the previously disadvantaged communities but this has expanded their business to provide the following services for their clients and partners:

- Assessment of your company's B-BBEE scorecard so as to provide solutions to achieve the **maximum B-BBEE points**
- **Partnership opportunities** to improve on the Ownership and Supplier Development elements of the scorecard
- **Supply chain** and product distribution opportunities within the motor industry, manufacturing and related sectors
- Skills Development through the training hub which provides **SETA accredited** and non-accredited training focused mainly on unemployed youths
- Enterprise and Supplier Development through community based **entrepreneurial upliftment** and job creation projects
- **Socio Development** through feeding schemes which aims to provide a nutritious product to the most vulnerable of our society

Let us assist you to make a real difference while you utilize your B-BBEE spend to add true value to your business.

LEASE TRACKER
DOCUMENT TRACKER SOLUTION

Document Management Solution

Secure cloud storage for all your important files, supported by flexible and efficient approval workflows

The Document Management Solution (DMS) is a reliable, cloud-based platform that provides secure and structured information storage for all important documents and files, including customisable and secure approval workflows.

- **Optimise contract management & reporting**
  Create and manage your contracts and credit facilities within a few clicks and enjoy user-friendly reports to gain key insights into upcoming payments, credit facility utilisation and maturity analysis.

- **Flexible Approval Workflows**
  Unique approval workflows can be created for each individual document, allowing for single or multiple levels of approval. Sequential approval workflows are also supported, meaning that the order in which files and documents are approved can be setup to align with your organisation's approval hierarchy.

- **Notifications & Reminders**
  DMS supports system notifications and reminders for all key data elements. Set up reminders for approval deadlines, contract expiries, document reviews and more.

- **Optimise accounting & reporting**
  Create and manage your finance contracts and credit facilities within a few clicks and enjoy user-friendly reports to gain key insights into upcoming payments, credit facility utilisation and maturity analysis.

- **User Segregation**
  Unique built-in user roles which align to various permission levels help ensure that data is kept secure and access privileges are maintained in line with your firm's policies.

- **Automate calculations & updates for rate changes**
  Calculations are built into the system, and rates are updated automatically as interest rates change, so you'll never need to prepare calculations or manually process updates for rate changes again.

- **On-boarding**
  Let our team of accounting professionals assist you in transitioning to an Asset Management System whilst providing you with best-practice advice.

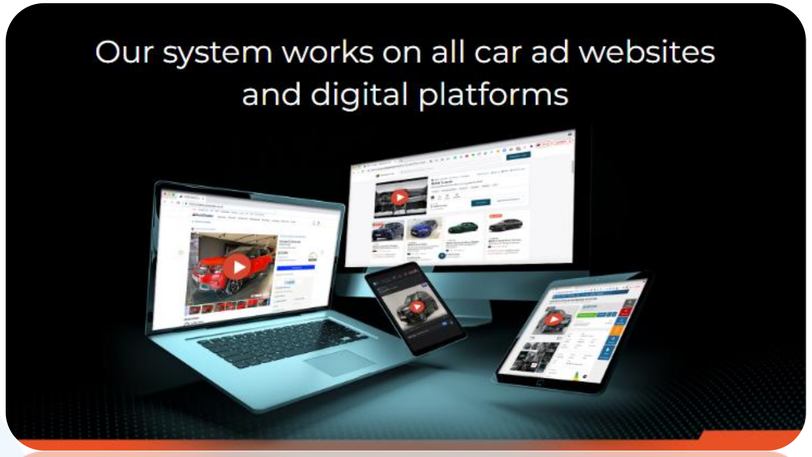
LOR Technologies - PHYRON

The Easy Way To Make Your Cars More Attractive!



"Our objective is to find simple ways of making car ads as attractive and engaging as seeing the cars in a showroom."

Creating good videos for online marketing is cumbersome as it takes time to create and is often just for a single product. It is not designed to do a lot of videos quickly and effectively.

PHYRON solves that problem with Video+AI.

- We fetch the images and specifications from your car ads
- Our AI Automatically creates and add video to all your cars within 10 minutes
- The video is updated if the ad is changed
- Everything is done automatically with zero manual work

The easiest manner to add video to all you online listings – on your website and other third-party platforms!

LOR Technologies is the official licenced partner for Phyron in Africa

Orange Owl

Specialising in Vehicle Protection, Safety Products, Environmentally Friendly Waterless Car Wash and a wide range of Cleaning Chemicals.

Orange Owl was developed with a motive to introduce pioneering products to the South African automotive industry, aiming to amplify dealer retention and concurrently provide consumers with high-quality additions to their vehicles.

Product Offerings:

- **Crystal Fusion Windscreen Protector :** molecularly fuses with glass to form a hydrophobic barrier. It enhances visibility in bad weather, reduces glare by 34% at night and 24-month windscreen chip repair benefit.
- **Crystal Fusion™ Premium Ceramic Coating:** engineered to protect vehicle paint against contaminants, dirt, grime, insects and acid rain and prohibits them from attaching to the surface by means of super hydro-phobic barrier.
- **Crystal Fusion™ Superior Waterless Car Wash:** a protective coating that contains a special mixture of chemicals that breakdown and liquefy vehicle surface dirt on contact.
- **Graphene Coating – Keep your vehicle looking brand new!:** Graphene is a game-changing, carbon-based molecule that can effectively bind to and fortify surfaces when functionalized through a graphene dispersion. Formulated to provide a layer of protection on its own, or as an enhanced booster of existing protection, chemically bonds with the car's paint and creates a new layer of protection forming a semi-permanent shield with the paint.
- **Orange Owl Cleaning Chemicals**: We supply a wide range of cleaning chemicals for industrial and household purposes such as Hand Cleaner, Degreaser, Floor Cleaner, Leather Cleaner, Liquid Hand Soap, Dish Liquid, Deo Blocks, Pine Gel and many more.

Orange Owl is a proudly South African Company currently operating in South Africa, Namibia and Australia dealing with 365+ dealers. We strive to provide added value to all our clients from a B2B and consumer perspective and constantly look to improve the way the Motor Industry operates through innovative and up to date technology that speaks to forward thinking solutions.

VehicleFacts provides vital information as it relates to the vehicle that Clients are selling / buying / trading:

- **Is the vehicle genuine - and not a cloned / falsified / stolen / suspect vehicle.**
- **Value Added Products - detailed reports included in the delivery package of all vehicles.**

VehicleFacts offers integration capabilities or a standalone system.

VehicleFacts is the only platform that provides Clients the ability to confirm the identity of a vehicle themselves. Providing protection for businesses & clients from purchasing illegal & devalued vehicles.

With VehicleFacts:

- **Access to multiple datasets providing a risk profile on registered vehicle information**
- **Reduce the risk & loss of trading in stolen & cloned vehicles**
- **VAPs for increased value in every deal**
- **Access to services such as inspections & roadworthy's or police clearance and verifications**
- **Streamlined technology capturing company vehicle movements linked to the driver whose details are registered and authenticated. Geo-locating where the meeting took place.**
- **Access to a registry of the clients and vehicles details, all date and time logged**
- **Compliance with the Second-Hand Goods Act**
- **Live market related information pertaining to the vehicle**
